

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Recently retired, after spending many years working with his brother to develop their crane business into an market leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

Whilst on their trip, John spent time talking to former business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a vast market for a product that could swiftly and safely elevate individuals in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John formed a joint venture with two friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they created and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into quite a few international markets and continues to cultivate new equipment to guarantee that customers are able to become safer and more well-organized within their workplace.
